*Western region,
especially Lvov, is
responsible for 50%
visitors of Euro 2012*

Why waste and municipal services?

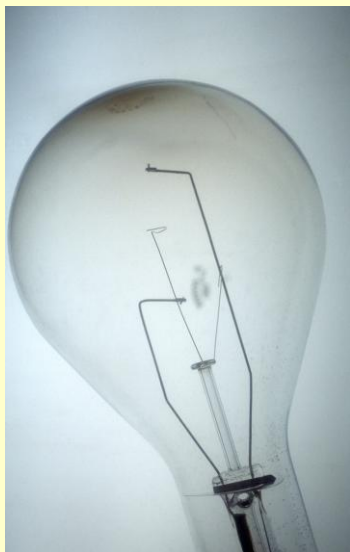

- ✓ New solutions concerning investments to the systems of waste recycling, emissions' and dumps' clarification, energy-and resource saving – are the most pressing questions of the modern life.
- ✓ Implementation of new technologies and ecological education – one of the most effective tools to solve such problems
- ✓ Correct investments – is the positive ecological-economical effect on every person, business, state, and entire society and environment

Why ECO Solutions?

- ✓ The conferences, seminars, presentations and expositions at one time on one territory
- ✓ The concentration of information, new technologies, useful contacts and meeting in ecological sphere
- ✓ State and local programs and resources for implementation. Presentation programs to Euro 2012
- ✓ Best practical experience in developing of environmental projects

You are participant. Why?

- ✓ Establish partner relationships, meet investors, business structures, producers, consumers, state and local public authorities, and foreign partners, funds, representatives.
- ✓ Open new market – increase sales, demonstrate company's achievements, present own projects, share experience with domestic and foreign participants.
- ✓ Find new partners and customers, increase potential your market and create new business opportunities

Investments and implementation of newest ecologically technologies will allow receiving dividends not only for your company, but for entire humanity.

Specialized exposition's topics

Energy- saving.

Energy- and resource- saving technologies, systems and equipment. Energy-saving equipment and technologies in building, industry and municipal spheres. Heating electric power stations. Coppers. Burners. Diesel and steam units Pumps. Compressors. Hydraulic equipment. Convector. Radiators. Computer-based systems of measure and control of energy consumption, control equipment. Measure equipment of heat and power systems

Alternative and Renewable Energy.

Solar, wind, geothermal, bioenergetics, small hydro-electric systems. Repeated utilization of energy supply, energy supply economy systems. Waste energy production. Technologies, production and using of alternative fuel, bio-fuel, biogas

Industrial and municipal waste

Collection, sorting, transportation, processing and utilization of waste. Waste recycling, waste processing technologies Building and using ranges of municipal waste Restoration of municipal waste ranges and polluted territories Systems and technologies of waste management Machines and lines for collection, sorting and transportation waste. Refused bins and dustbins

Municipal services

Engineering networks (projecting, construction, reconstruction, and usage). Management of gas-, heat-, water-maintenance and water drains. Materials and technologies heat-, hydro- isolation and for engineering networks' building Municipal heating energy systems. Systems and technologies of water-supply, water-cleaning, drainage systems, sewerage. Water quality control. Water protection and hydro-technical constructions. Street cleaning machines (machines for sweeping, watering and vacuum, snow-cleaning machines, vacuum cleaner, lawn-movers). Drain cleaning equipment, heat cleaning equipment, sewerage cleaning. Multifunctional machines Recreation zones; children and sport areas. Ecologically projects. Financial institutions. Scientific working-up, automatic control systems, software, engineering, consulting, banking, leasing, insurance and expert services

Business Part

Section 1. «Complex management of municipal and industrial waste»

*Recycling technologies
Recultivation of territories
Waste management systems
Waste processing technologies
Best projects of waste management*

Audience:

Enterprises-polluters in Lviv and Western Ukraine regions,
Waste owners,
Heads of regional, areal, and city administrations, chiefs of profile managements in spheres of ecology and municipal services, scientists, enterprises involved in waste recycling and processing, public organizations , small and middle business, and all interested people.

Invited to participate:

Companies-developers and owners waste recycling technologies; scientists, industrial enterprises; authorities; financial institutions, public organizations

Organizers:

Exhibition Center
«LEMBERG»

Geochemistry
environmental Institute NAS
Ukraine

OJSC «Girhimprom»,

State environmental
administration of Lviv region

Section 2. «Alternative and Renewable Energy»

*Solar, wind, geothermal, bioenergetics, small hydro-electric engineering
Repeated utilization of energy supply, energy supply economy systems
Waste energy production
Technologies of production and using of alternative fuel, bio-fuel, biogas
Financial instruments for realization of energy-saving projects*

Audience:

Municipal services, heads of regional, areal, and city administrations, chiefs of profile managements in spheres of ecology and municipal services, scientists, small and average business, all interested company and people.

Are invited to participate:

An equipment and technologies producer, municipal service companies, experts, state and regional authorities, financial institutions and public organizations.

Organizers:

Ministry of municipal industry
of Ukraine,

Geochemistry
environmental Institute NAS
Ukraine

Exhibition Center
«LEMBERG»,

State environmental
administration of Lviv region

Central administration of
municipal services of Lviv
region

Section 3. «Energy-saving solutions Modernization of municipal industry»

Organizers:

Ministry of municipal services
of Ukraine,

Central administration of
municipal services of Lviv
region

Exhibition Center «LEMBERG»

Energy-saving solutions.

*Energy-saving equipment and technologies in building, industry
and municipal spheres*

Municipal systems (electricity, heating, water)

Engineering networks (construction, reconstruction, and usage.

Materials, technologies, equipment

Monitoring and cleaning of drinking water's quality

*Water protection and hydro-technical construction, water
departments and water drains*

Clarification of industrial and municipal waters

*Municipal road cleaning equipment: streets, squares, parks,
children and sport areas.*

Audience:

Heads of regional, areal, and city administrations, chiefs of
profile managements in spheres of ecology and municipal
services, enterprises-polluters, representatives of municipal
sphere, municipal services company, public organizations, small
and average business, all interested people.

Invited to participate:

An equipment and technologies producers, municipal service
companies, state and regional authorities, financial institutions
and public organizations.

Participation conditions:

Standard package of exhibition participants

Equipped stand – 6 sq. m. (stand's panels, friezes with company name – 20 characters); 1 socket 220 V, 2 fixtures; 1 table, 2 chairs, 1 urn, carpet covering.

Publication of company's information in the exhibition catalogue, 1 copy of catalogue, 2 participation badge; Participation in business-mix (1 representative)

Additional opportunities:

Free entry to Forum's conferences and seminars
Internet link: from Forum's web-site to the participants' web pages. Invitations to visit exhibition for partners (5 persons)

Standard package of participation in conference, seminar, and session

Lecture / presentation (30 minutes in specific scheduled time), 1 catalogue, 1 participation badge, participation in business-mix

Additional opportunities:

Free entry to Forum's exhibition, conferences and seminars; Placement of companies' names on the web-site in the participation list; Distribution of advertisements during the conferences

Standard package for conference participants (listeners):

Free Entry to Forum's exhibition, conferences and seminars
1 copy of catalogue, 1 participation badge
Advertisement materials of the lecturers

The number of presentations is limited.

We are waiting for the materials of your lecture: outlines and Power Point presentation: 30 minutes.

Deadline - 15 of January 2011.
